# SECURE EVIDENTIAL AUDIO/VISUAL DIGITAL INTERVIEW RECORDING

The **Evidence***Works*® IRS solution is the UK's market-leading solution for capturing evidentially-sound recordings of interviews with suspects, victims and witnesses. It's widely used by police forces across the UK and by other UK and international agencies, including the International Courts of Justice, where an interview's evidential integrity is of paramount importance.

Benefits-driven and compliant

✓ Largest network-capable evidential interview unit supplier in the UK

✓ Available in multiple form factors fit for use in many different environments

✓ Fully embedded integration with records management systems

✓ Live monitoring of networked units

✓ Fully compliant with PACE guidelines

✓ Wholly digital recordings capable of standalone use or integration with the **Evidence***Works*® DEM or third-party digital evidence management solutions

FEATURE-RICH AND FLEXIBLE

The **Evidence***Works*® market-leading solution provides:

- State-of-the-art digital interview recording software and purpose-designed devices
- Software-only solutions for PCs and laptops
- Evidentially-sound digitally-signed recordings
- Simple and intuitive touchscreen operation providing one-touch recording
- Support for up for four audio streams (internal and external microphones) and four camera streams, including pan-tilt-zoom camera support
- Configurable business information (metadata) captured alongside interview media
- Live monitoring from any location on the force network when connected

- Adjacent room monitoring support
- Resilient to power failure
- Covert or overt interview bookmarking via remote key fob
- Operates:
  - as standalone devices burning DVDs (up to three simultaneous copies), or
  - with network-attached devices, allowing optional DVD-free environment, integration with operational IT systems for business information, and interview media exchange and remote support
- Solutions for interview transcription and downstream interview management
