# WEB-BASED MANAGEMENT OF DIGITAL INTERVIEWS AND EVIDENCE

The latest **Evidence***Works*® Web Client application delivers a modernised, enhanced, browser-based solution for the storage and management of digital interviews and other digital evidence media where evidential integrity is of paramount importance.

Configurable and compliant

✓ Live monitoring of networked interview recorders

✓ Fully compliant with PACE and MoPI guidelines

✓ Network storage and management of media

✓ Optional extension to include a wide array of digital media sources

✓ Optional Records Management System integration

✓ Optional enhanced video management functionality - redaction, encrypted downloads

FEATURE-RICH AND FLEXIBLE

The **Evidence***Works*® web client provides a modernised and intuitive user interface with simple navigation and search functionality to enable quick access to key media, recordings and metadata.

Recording monitoring and playback

- Live monitoring of interviews from any networked device based on user permissions
- Full playback of recorded media supporting MP4, MP3 and WebM
- Embedded transcoding engine for addtional file formats
- Playback controls include pause, frame-by-frame nudge, playback speed and bookmarking
- Compatible with USB Foot pedals to allow 'handsfree' review or transcription

Media Search

- Search recordings and other data based on access rights using configurable parameters and filters. Searches are saved under user profiles for future use. Searches can be extended to include additional metadata for disposal and retention records

Media Management

- Create and upload recordings and evidence files
- Manage metadata
- Manage user access
- Append additional items to evidence files
- Configurable user rights to allow media download with a licensible option to encrypt

Video Management

- Take clips and snapshots from video media using simple edit tools
- New files are stored alongside original files to preserve evidential integrity
- Licensible option to provide redaction tools to hide, blur or obfiscate sensitive content

Disposal and Retention

- Initial retention period determined by evidence type, links to key references or relating to a serious offence
- Admin level access to modify disposal dates and retention periods, place displosal on hold, execute immediate disposal and add or review disposal notes
- Full MoPI compliance

Security Controls

- Full user access rights management
- Ability to evoke/revoke access on a file-by-file basis
- System-wide user activity audit

RMS Integration

- Additional module licence
- Access **Evidence***Works*® direct from RMS to enable evidence creation and searches
- Notifications of creation or updates to evidence items
