NEC

# NEXT GENERATION LEARNING

Our next generation learning solution will help you to train your user base promoting a learning culture that will have benefits across the whole NEC Connect programme.

## PRODUCT GOAL

Working in partnership with the force to provision digital learning materials which can be accessed anytime to provide formal and informal learning. Its objectives are to:

- Increase skill levels and support for our users promoting effective and efficient use of NEC Connect
- Increase satisfaction across our user base
- Provide learning collateral that will help forces train Connect in a cost-effective way reducing the overheads associated with the development of training materials
- Provide our forces with updated training collateral at the time of each release of NEC Connect
- Reducing the training development and delivery window (by up to 50%) helping forces to go-live quicker with NEC Connect
- Provide a powerful MI tool that allows the force L&D team to monitor and manage learning
- Harnessing the latest technology within the L&D industry to develop impactful learning which puts the needs of the force and their users first

## SERVICE OFFERINGS AVAILABLE

- **Learn.NEC:** Fully configured with your user data and learning collateral
- **Content:** All Connect digital learning content
- **Reporting:** Custom built reporting dashboard to monitor learning
- **Just in Time learning:** How to Videos and Connect Explainers embedded into the product providing users with access to learning at the time of need

## OTHER ADDON SERVICES

- **Training Needs Analysis:** Our training consultants will analyse your forces Connect training needs and produce a comprehensive TNA output which will identify the roles that need training on Connect and the areas that they require training on
- **Bespoke Content:** Working in partnership with your L&D and SME teams we can create bespoke content which compliments the Learn.NEC content offering (for example: videos explaining specific force business processes)
